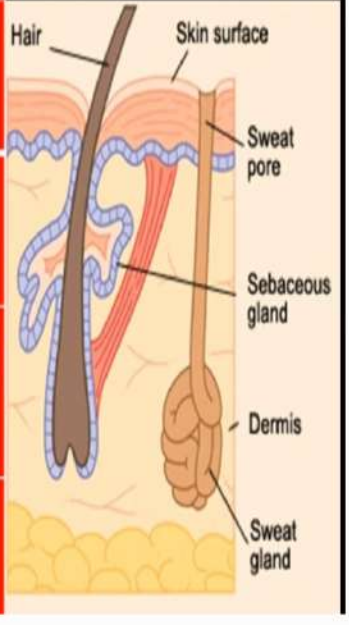
Miliaria (sweat rash)

MILIARIA (SWEAT RASH)

- Eccrine Duct

Warm → Duct Obs → Miliaria

	Miliaria crystallina	Miliaria rubra	Miliaria profunda	Miliaria pustulosa
Level Of occlusion of duct	At the skin surface	Intraepidermal part	dermoepidermal junction	Any one + 2ry Bacterial Inf
Clinical Pic	-Clear Vesicles -No erythema	-Papules and vesicles -Red halo	-Large Papules and vesicles	Multiple Pustules
Treatment	-Cold water compresses -Proper ventilation			Topical AB+



Treatment of miliaria:

- Cold water compresses, and good ventilation (e.g. A/C) are all that is required.
- Avoidance of hot humid and closed places, and wearing cotton-made garments.

مكتبة التاج

Miliaria

Diagnosis: miliaria crystalline

Causes : occlusion of eccrine gland duct at skin surface

Lesion: PRY (clear vesicle with erythema)

Miliaria

Diagnosis: miliaria rubra

Causes : occlusion of eccrine gland duct at Intraepidermal part.

Lesion: PRY (papules and vesicle surround by red halo or diffuse erythematous)

Miliaria

Diagnosis: miliaria profunda

Causes : occlusion of eccrine gland duct at dermoepidermal junction)

Lesion: PRY (large red papule or vesicle)

Rash is flesh colored opposed redness of rubra

Miliaria

Diagnosis: miliaria pustulosa

Causes : inflammation with secondary infection

Lesion: PRY (pustules)
